Pineapple Sage – *Salvia elegans*

Tips for Use:

- The young leaves have more flavor than older leaves.
- To infuse in hot liquid, chop leaves and steep in hot liquid for 10-15 minutes. Strain and proceed with recipe to make tea, simple syrup, jelly, ice cream or sorbet base, etc.
- Infuse flavor into baked goods such as pound cake by lining the pan with parchment paper and adding a layer of leaves to the bottom of the pan before pouring in the batter. Bake as directed.
- Chop and add approximately 2 tablespoons to your favorite pound cake recipe.
- Chop and add leaves and/or flowers to fruit or chicken salads.
- Make a compound butter by incorporating chopped leaves and flowers into softened butter. Pairs well with lemon herbs such as lemon verbena, lemon thyme and fruit mints.
- Add a sprig to iced tea, lemonade, water or other cold beverages.
- Add a chopped tablespoon full to your favorite tropical fruit smoothie.
